

ZIM'STM
INNOVATION IN PACKAGING

Flexible film mailers

Flexible film mailers offer a less expensive yet safe alternative to corrugated mailers when packaging soft goods for delivery. Flexible film mailers provide superb puncture and water resistance and weigh significantly less than their paperboard and corrugated counterparts. Your product will be better protected from environmental factors and the decreased package weight will save you money on delivery. Mailers can be custom printed and a large range of size options are available.

For oversized items, try our Extend-A-LengthTM mailers. Extend-A-LengthTM mailers are available in lengths greater than 50 inches and offer the same puncture and water resistance as our standard mailers. Extend-A-LengthTM mailers can be lengthened virtually indefinitely to meet your specifications.
